

# kairos II

Vertigo sport

MULTIFUNCTIONAL MACHINE  
WITH DOUBLE PULLEY

### Description:

The Kairos system was created from a revolutionary idea combining cutting-edge technology with precise biomechanical design: the result is a machine for **functional training** and **neuromuscular rehabilitation** which is one of a kind. **Triple pulleys** design allows perfect alignment of the cable and distribution of loads with any traction for a feeling of **extreme stability and precision** during movement, even with high loads.

### Utilization:

Kairos II is equipped with **pneumatic** cylinders specially developed for each specific training activity and type of user. The machine's power can **easily be increased**, by simply changing the compressed air actuator.

Kairos II is equipped with a sensor **dedicated** to monitoring the force in **real time** to make the exercises even more effective and to make training an enjoyable experience.

**It can be used by everyone.** It is perfect for those who play sport to keep fit and for high-level athletes who want to train up to the maximum limit in complete safety.

### Features:

- Multifunctional cable column (L 120 X P 31 X H250-270cm)
- Maximum force depending on version from 50 KG to 120 KG
- Continuous and independent manipulation of the handpiece
- Stainless steel sliding bars with adjustable side supports
- Connectivity: Wifi, Ethernet
- Available in three versions: Rehab, Sport and Performance
